

BrightVault is a Custom energy storage system with a virtually limitless range of sizes on both the output, and energy storage side. We understand that sometimes projects are further out and not ready to contract, but still need design documents produced for construction planning. The following quote includes the FULL "BrightVault Design Packet" that comes with every BrightVault System, along with an engineering and design credit for the full cost of the design documents against a BrightVault System.

Custom BrightVault Engineering and Design Quote Includes...

* Full BrightVault Design and Engineering Packet

- Project Specific Runtime Estimates (based on actual loads)
- Project Specific Electrical ESS One-Line
- Project Specific Elevation Drawing
- Project Specific Controlled Load/Panel Schedules
- Project Specific Smart Panel Wiring Schedule
- Responsibility Matrix
- Permit Documents
- Standard Project Documentation including clearances, cut sheets, etc.

* Included

- Initial System Design and Engineering
- (2) One Line Revisions
- (2) Panel Schedule Revisions
- (2) Elevation Revisions
- (1) Permit Document Set when ready for permit
- (2) Hours of Project Coordination/Design Meetings

* Excluded

- Engineering Stamp (Typically by Project MEP)
- Revisions beyond the included (3)
- Permit Costs
- Solar Design (Available as an add on)

Price : \$7,500

Credit Upon Full System Contract : -\$7,500

* Changes/Time Beyond the included revisions will be billed at \$175/Hour, labor in addition to the design contract base amount is not creditable upon contract.

** Portions of the Design Packet will be added as documentation is available. (Eg. If panel Schedules are not ready, adding later will not count as a revision).
