

BRIGHTVAULT

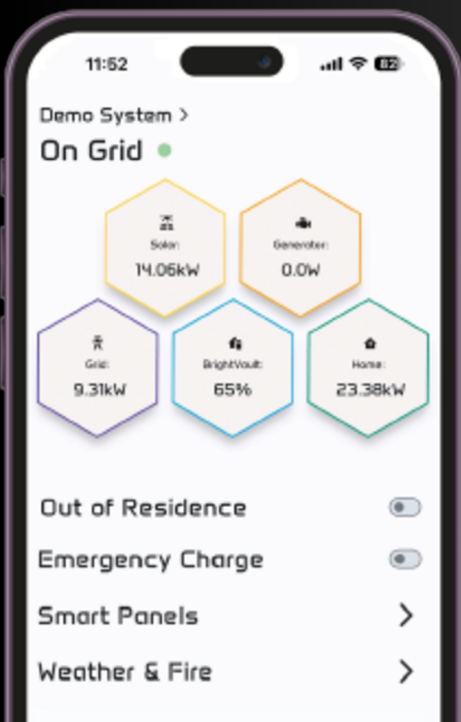

NO GRID DOESN'T HAVE
TO MEAN NO POWER

When severe weather strikes or unexpected outages occur, your energy needs don't stop. Our cutting-edge energy storage solutions provide a dependable backup, allowing you to maintain power where and when it matters most.

BrightVault is the only energy storage system built specifically for luxury homes. With the ability to back up 2400 Amp single or 3-phase electrical services with virtually unlimited storage sizes, and industry-leading load management, no project is too big for BrightVault to handle.

For smaller projects and EM panel backup, BrightVault Lite offers a streamlined version of the cutting-edge technology found in our flagship BrightVault system.

LITE

Authorized Dealer

BRIGHTVAULT

THE OTHER GUYS

UP TO 2400 AMP BACKUP

Typical Consumer Grade System 200 amp, some larger systems up to 800 amps.

VIRTUALLY UNLIMITED STORAGE WITH 9540A LARGE SCALE FIRE TEST CERTIFICATION

Systems are capped at 80kWh of storage without the 9540A Large Scale Fire Test UL certification.

3 - PHASE COMPATIBLE

No. Typically backs up 2 of 3 legs.

WEATHER DATA WITH 5 WEATHER API'S USED FOR RED FLAG WARNINGS

Some systems have weather data but use a single weather API.

WILDFIRE DATA

No.

INDUSTRIAL GRADE LOAD MANAGEMENT WITH LIFETIME WARRANTY

Typically no load management or consumer grade (bluetooth) load management with slower shed times.

IMMEDIATE AND PRIORITY LOAD SHEDDING TO INCREASE RUNTIME AND PREVENT INVERTER OVERLOAD AND SHUTDOWN

No. Slow load shedding or no load shedding leaves the inverters vulnerable to system shut downs due to inverters being overloaded.

WHITE GLOVE INSTALLATION, ENGINEERING, DESIGN AND PERMITTING (ONLY ON FULL BRIGHTVAULT, NOT ON LITE)

No. Dealer needs to find a third party to handle engineering / design and install the system.

HOME AUTOMATION SYSTEM INTEGRATIONS

No / Locked in to one automation system
